SUMMARY OF INFORMATION

X The site is a flat, green open fenced area. The fencing is brown and wooden railish type. Immediately outside of the fencing on one (short) side is a region of trees. Beyond the fence on the far (long) side is ^a scenic, peaceful sloping view. On the third side (long) beyond the fence is a dirt/gravel area for parking.

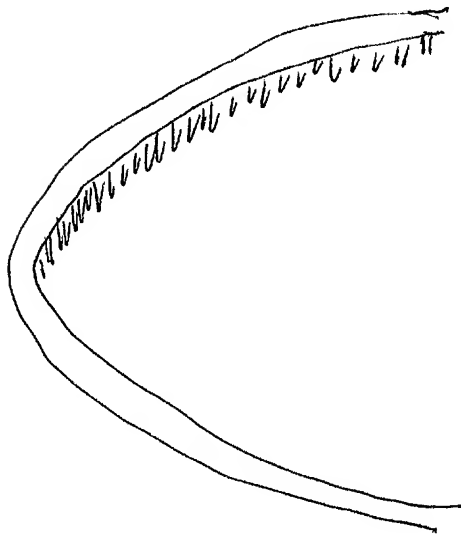

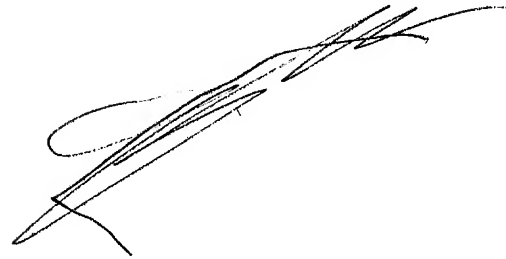

X Somewhere in the area the following objects/slash structures are placed: (see sketches) a v-roofed structure (wooden), an odd black metal thing with both an odd angular and cylindrical feel and circular/oval area with a raised ring around it.

When probing for people/activities, I immediately went into empathy with someone and experienced sharp pain in my foot. The skin was not broken nor the bones, but it was a severe bruised area on the soul of the foot from a sharp object. The injury resulted in pain any time weight was put on it. It caused extreme limping.
